## Introduction

In this reference document we list TTS languages and voices available with SitePal. Contents are separated into two main sections:

- Built-in Voices
- 3<sup>rd</sup> party Voices

The built-in TTS voices are available to SitePal customers with every subscription plan that supports TTS.

3<sup>rd</sup> party voices are available from leading providers which have been pre-integrated with SitePal. To use 3<sup>rd</sup> party voices you need to *connect* them to your SitePal account. You can do so in your SitePal ‘Connect’ page.

The voice tables in this document list Engine IDs, Language IDs and Voice IDs to be used in SitePal API calls.

**Tip:** To preview SitePal built-in voices, you may want to bookmark this handy resource – [www.ttsdemo.com](http://www.ttsdemo.com). Select voices and try them out. Next to the selected voice you will see a small “cloud” icon – hover over it to see the API attributes of the selected voice. These are the same values you will find in the tables below.

## About 3<sup>rd</sup> Party Integration

To allow our customers a wider selection of voices and languages, SitePal is pre-integrated with several leading 3<sup>rd</sup> party TTS technology platforms. To use these voices you need to enter the corresponding 3<sup>rd</sup> party API key in your account’s ‘Connect’ page.

For example, to use Google’s TTS voices (Engine ID #11), you would need to:

1. Sign up with the Google Cloud Platform
2. In your Google Cloud account set up an “API resource” with permissions to access TTS API.
3. Copy your API Key from your Google account, and enter it in your SitePal connect page.

Detailed instructions for locating your 3<sup>rd</sup> party API Key for each provider are available in [Appendix A](#).

*Note: When you log-in to your SitePal account, the ‘Connect’ page is available from the options menu at top right.*

Please note that using 3<sup>rd</sup> party voices requires the Platinum plan or higher. You will also need to sign up to the 3<sup>rd</sup> party service, and will be billed by them directly for the usage in addition to your SitePal subscription.

## TTS Engine ID = 14 – Eleven Labs

Eleven Labs voices are account specific, with users creating and naming their own custom voices. As such there is no fixed voice table available.

To locate your available voices and Voice IDs, go to the “Connect” page in your SitePal account, and click on “Available Voices” next to the Eleven Labs API key. A list of voice names and Voice IDs will be displayed.

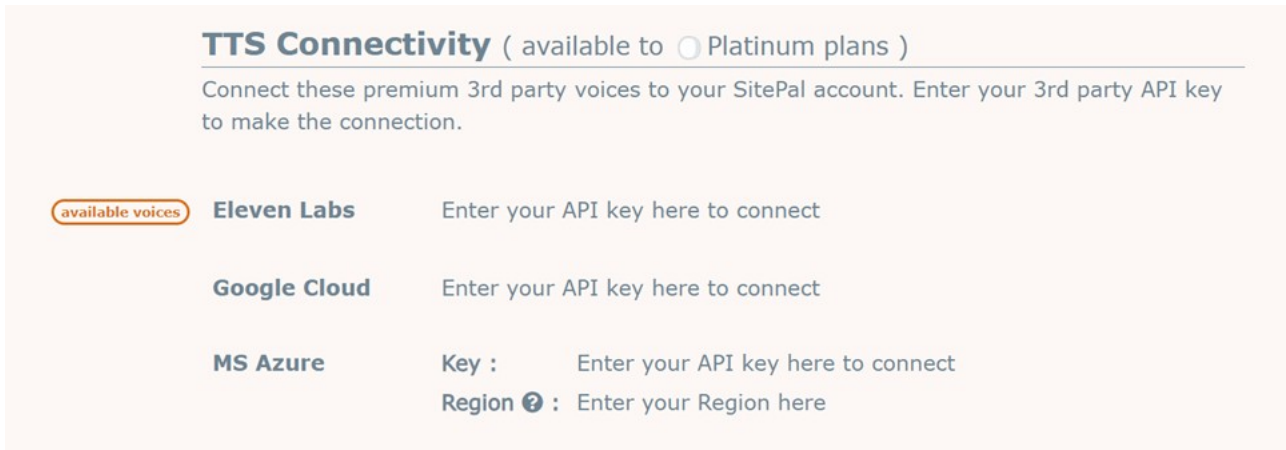

Use the listed Voice IDs as your API ‘Voice ID’ parameter for your selected voices. (Note: unlike other Engines, Voice IDs for Eleven Labs are an alpha-numeric string)

The Engine ID for Eleven Labs is 14.

## Appendix A – Adding Your 3<sup>rd</sup> Party API Key

To connect your SitePal account with any of our TTS partnered services, you need to add your 3<sup>rd</sup> party API key to your SitePal account. This is done in your SitePal account on the “Connect” page.

**TTS Connectivity** ( available to  Platinum plans )

Connect these premium 3rd party voices to your SitePal account. Enter your 3rd party API key to make the connection.

<b>available voices</b>	<b>Eleven Labs</b>	Enter your API key here to connect
	<b>Google Cloud</b>	Enter your API key here to connect
	<b>MS Azure</b>	Key : Enter your API key here to connect Region ⓘ : Enter your Region here

But before you can add your 3<sup>rd</sup> party key, you need to locate or create it. In each case, the API key is located in a different location, and can be a bit of a challenge to find. The following instructions will hopefully prove helpful.

Note: as companies modify their features and UI from time to time, these instructions may at some point become outdated. If you notice discrepancies, please let us know.

Your first step would be to sign up for the service of your choice. Then proceed to follow the instructions below.

### Google Cloud

Here's what you need to do to locate your Google API key:

1. Login to your Google Cloud Console
2. You must have a Project defined - if not, create one.
3. Select "APIs and Services"
  - You will see all Google APIs which are enabled for the current project.
  - One of them must be "Cloud Text-to-Speech API" - if not, select "+ Enable APIs & Services" at top and add it.

4. On the left hand menu bar, click on "Credentials" - and select "+Create Ceredentials" at top to create your API key.
5. Click on the key name to edit your key.
  - Verify that it is not IP or Website restricted
  - If it is restricted to specific APIs (generally a good idea) - verify that the Cloud TTS API is included.
  - it is generally a good idea to create a specific key just for this - and not piggyback on another key (which may already have existed)
6. Your API Key is displayed at top right, Copy it into your SitePal "Connect" page

The screenshot shows the Google Cloud console interface for editing an API key. The left-hand navigation menu has 'Credentials' highlighted with a red circle. The main content area is titled 'Edit API key' and includes sections for 'Key restrictions' and 'API restrictions'. In the 'Key restrictions' section, the 'None' radio button is selected, indicated by a red arrow. In the 'API restrictions' section, the 'Restrict key' radio button is selected, also indicated by a red arrow. Below this, a dropdown menu shows '1 API' selected, with a red arrow pointing to it. The 'Selected APIs' section lists 'Cloud Text-to-Speech API'. At the bottom of the main content area, there are 'SAVE' and 'CANCEL' buttons. On the right side, the 'Additional information' section displays the API key value, which is redacted with a black box, and the creation date, also redacted.

## Microsoft Azure

Here's what you need to do to locate your MS Azure API key:

1. Login to your MS-Azure portal
2. You must have an active subscription – if not, create one, by going to “Subscriptions” from your home page.
3. On your home page, if you see “Speech Services” as one of the services listed at the top of the page, click on it. Otherwise, at the top of your home page, click on “Create A Resource” (the big + button at top left)
4. Enter ‘Speech’ in the search field, and filter by “Azure Services Only”. Locate the ‘Speech’ resource template, and click on “Create” at bottom. Fill in the relevant fields, including your preferred ‘Region’, to create your Speech Service resource. We suggest you name it “SitePal”, and use it for this purpose only.

The screenshot shows the Microsoft Azure Marketplace interface. At the top, there is a search bar with the text "speech" entered. A red arrow points to this search bar with the text "Enter 'speech'". Below the search bar, there are several filters: "Pricing : All", "Operating System : All", "Publisher", "Product Type : Azure Services (5)", and "Publisher name : AI". A red arrow points to the "Azure services only" filter, which is checked. Below the filters, there is a banner for "New! Get AI-generated suggestions for your search." with a "View suggestions" button. The main content area shows "Showing 1 to 5 of 5 results for 'speech' with 1 selected filters." Below this, there are three service cards. The first card is for "Speech" by Microsoft, which is circled in red. A red arrow points to the "Create" button at the bottom of this card with the text "Create your Speech Service". The other two cards are for "Azure Bot" and "Azure AI Video Indexer", both by Microsoft. The "Create" buttons for these cards are also visible.

5. Now back on your home page, click on Your ‘SitePal’ Speech Service. Copy either of your keys into your SitePal account “Connect” page. You will also need to enter the ‘Region’ field, exactly as it appears on this page (eg. ‘eastus’)

## Eleven Labs

Here's what you need to do to locate your Eleven Labs API key:

1. Sign in to your Eleven Labs account
2. At top right there's a weird looking smudge, click on it and select "Profile"
3. Copy your API key to your SitePal "Connect" page.
